**Choose Bottle Type** PAGE 01

**Background Color & Shadow** PAGE 01

**Depth of Field** PAGE 01

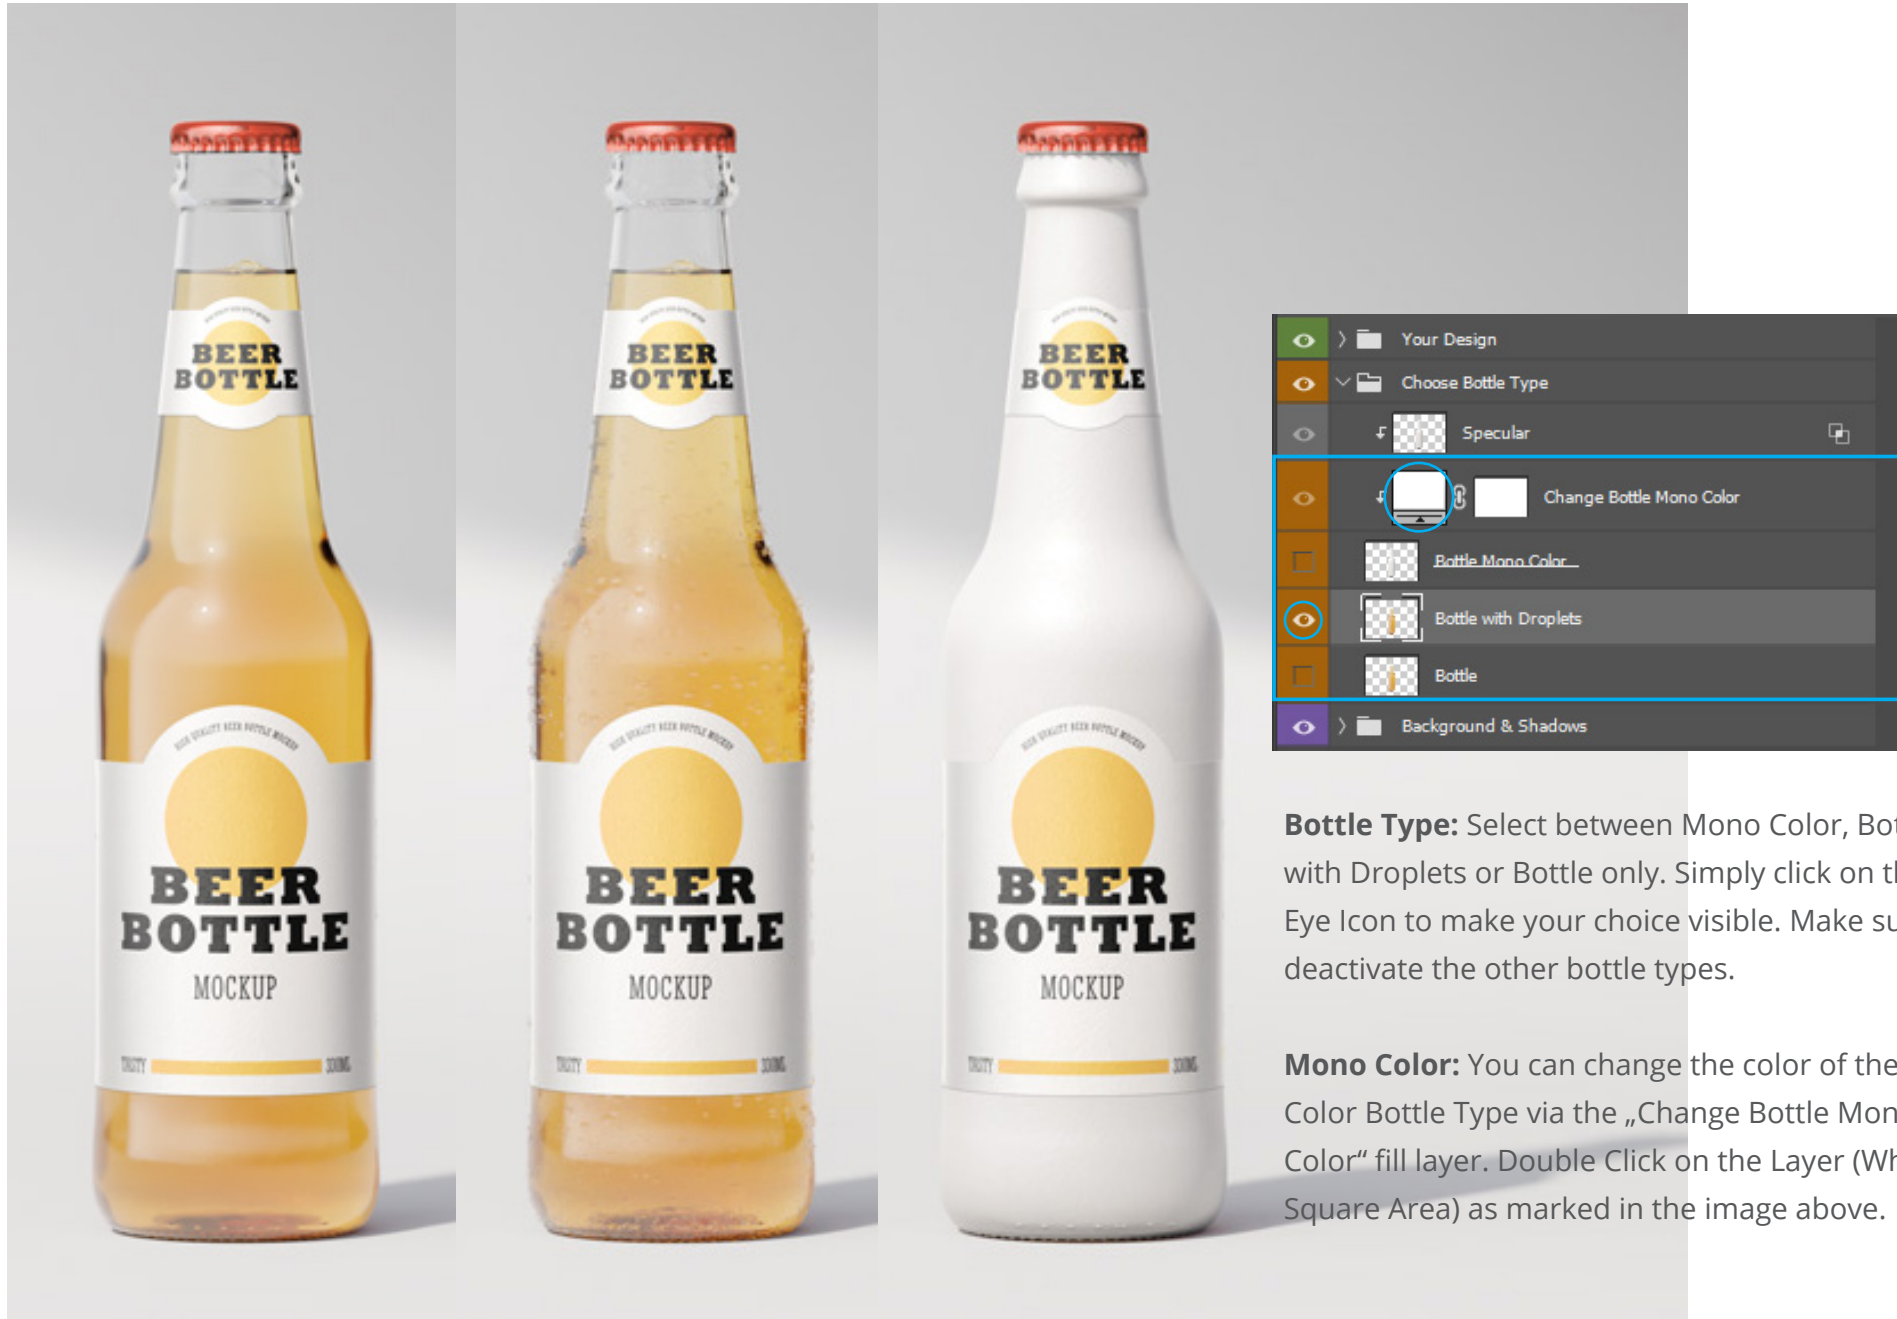

# Replace Design via 3D Layer

1. Select the 3D layer „Label“ in the „Your Design“ Folder
2. Double Click on the layer area „Place\_Design\_Here“ and a new window will open
3. Paste your design into the „Your Design“ Folder.
4. **Cap Color** can be changed via Shape Layer „Cap Color“ Double click and pick a color of your choice
4. If ready save and close this window

*Note: Make sure to set the „GUIDE“ Folder to invisible with the „Eye Icon“*

# Choose Bottle Type

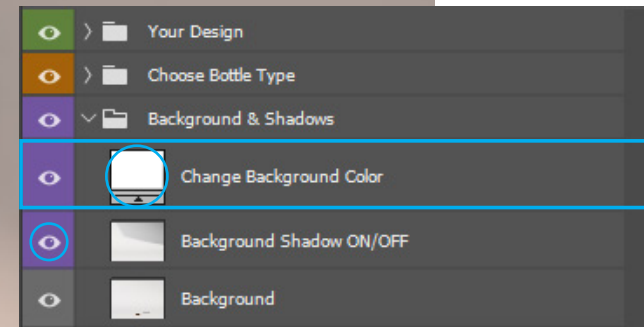

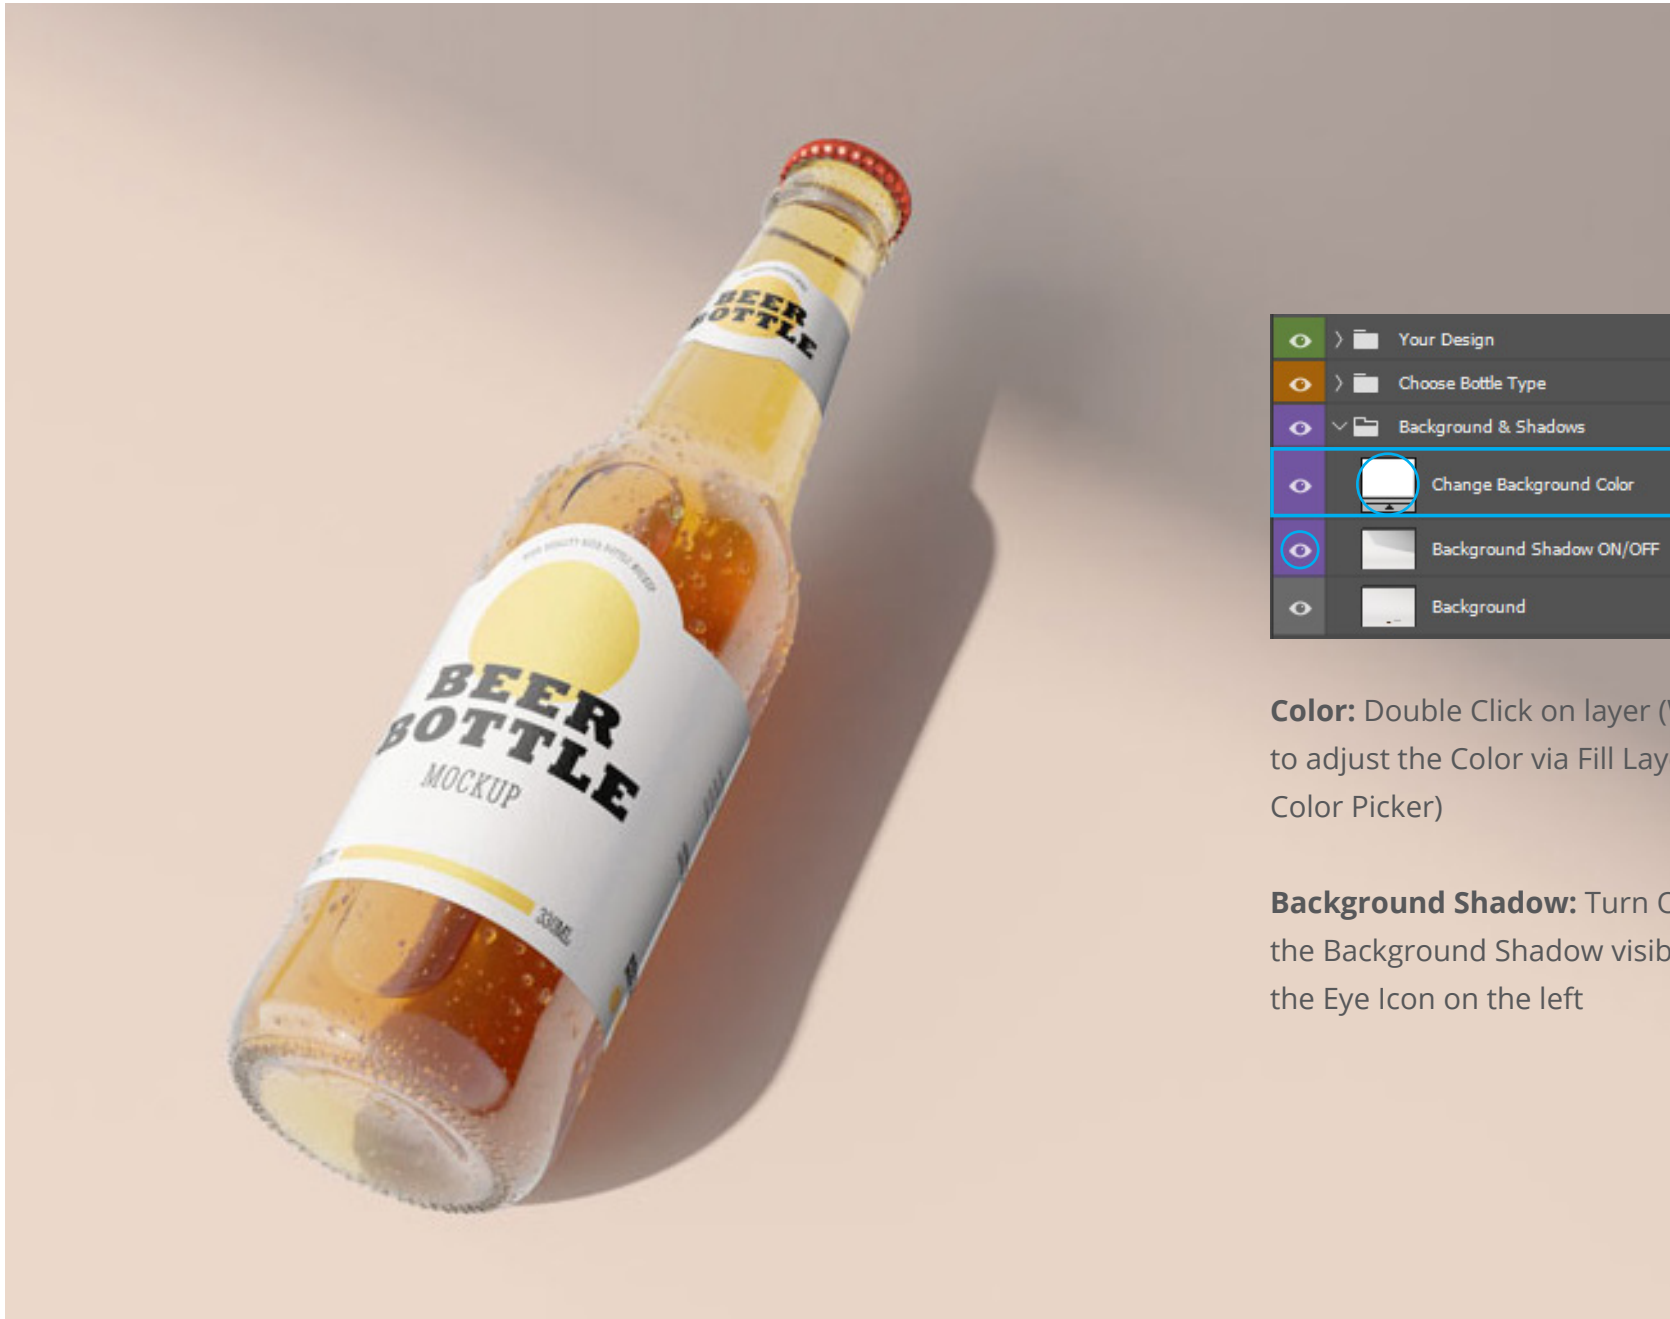

**Bottle Type:** Select between Mono Color, Bottle with Droplets or Bottle only. Simply click on the Eye Icon to make your choice visible. Make sure to deactivate the other bottle types.

**Mono Color:** You can change the color of the Mono Color Bottle Type via the „Change Bottle Mono Color“ fill layer. Double Click on the Layer (White Square Area) as marked in the image above.

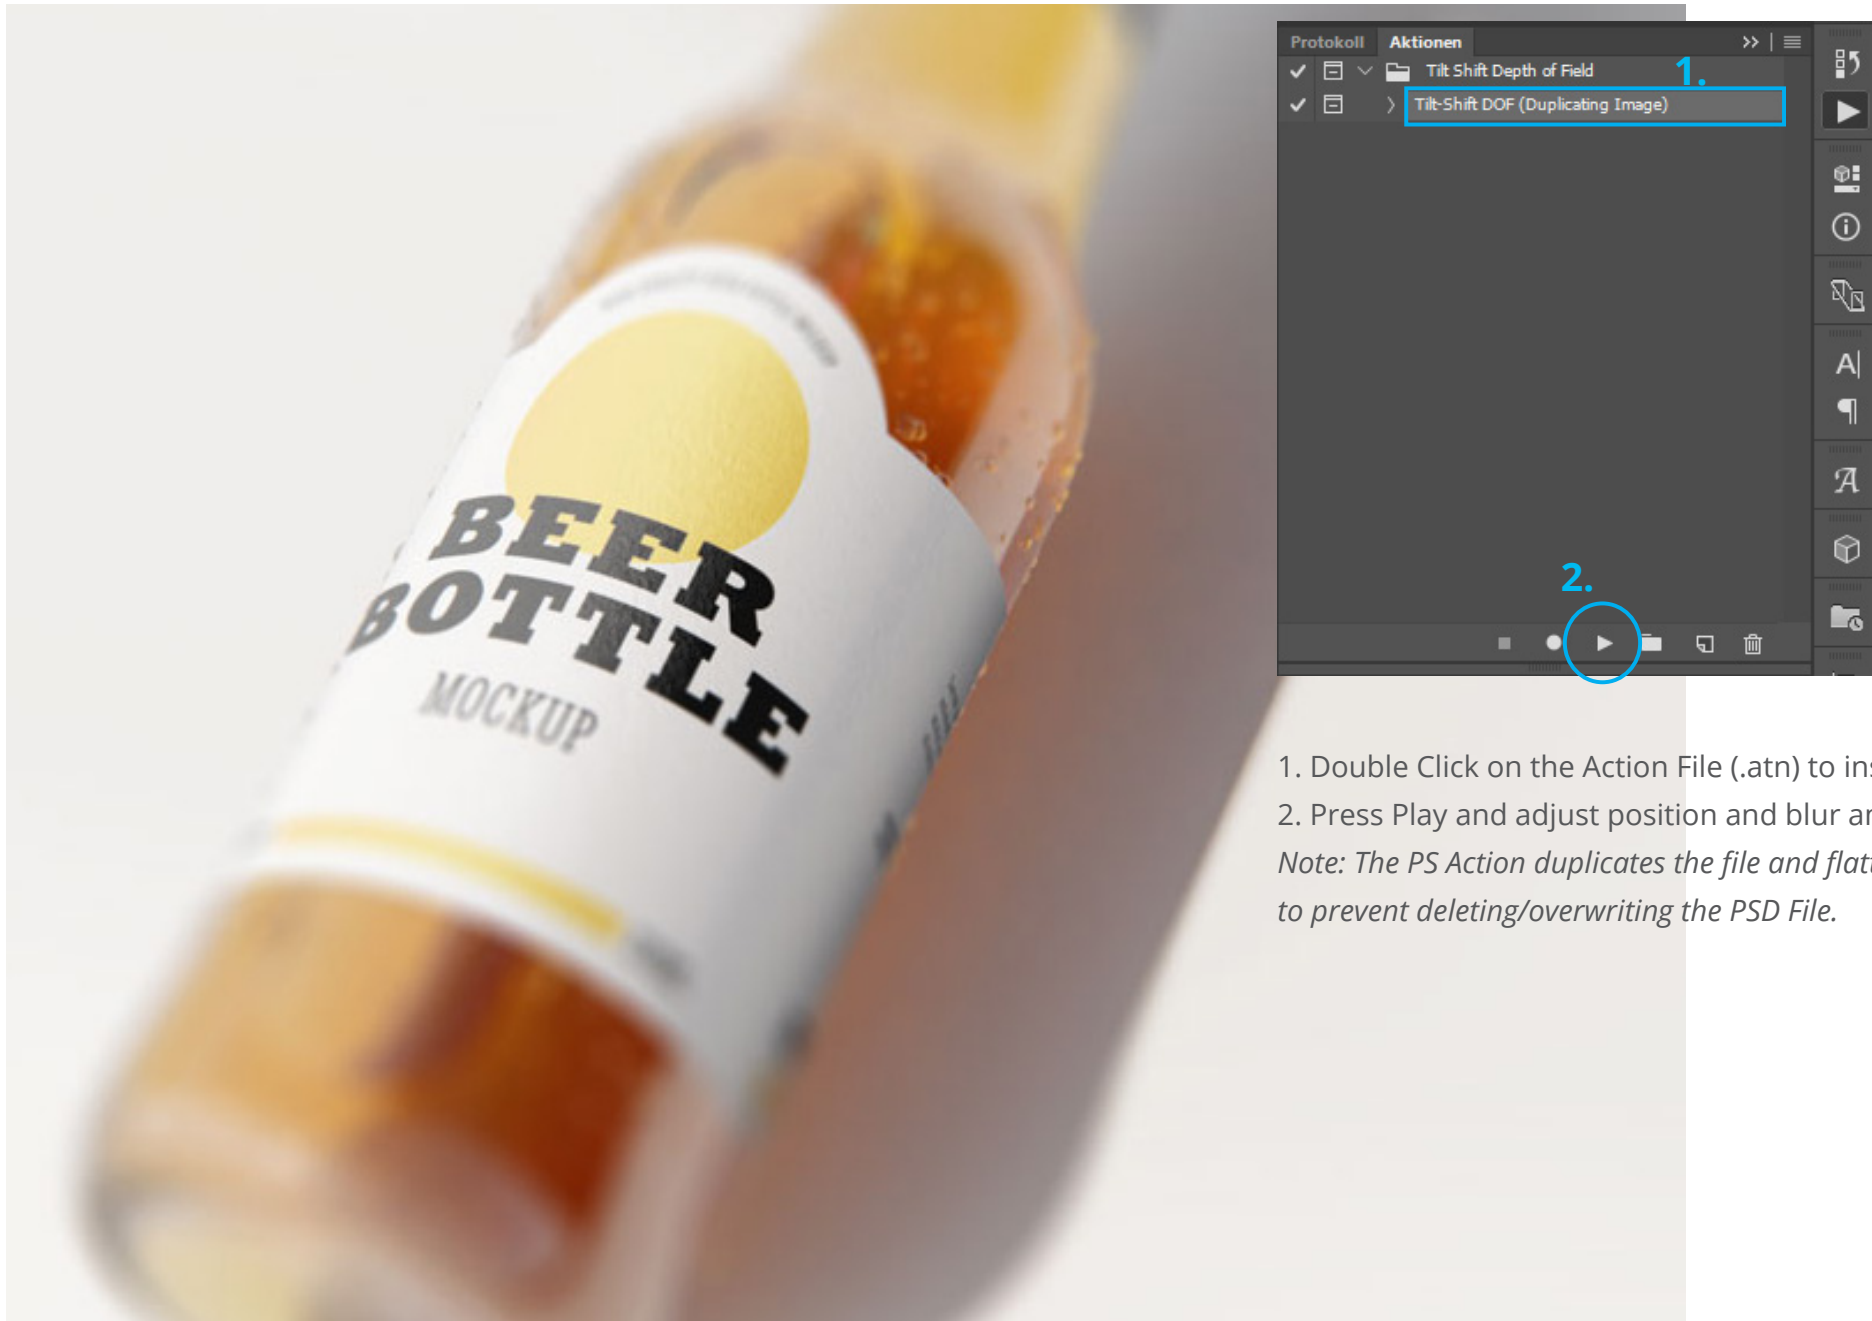

# Background Color & Shadow

**Color:** Double Click on layer (White Square Area) to adjust the Color via Fill Layer (Select Color via Color Picker)

**Background Shadow:** Turn ON or OFF to make the Background Shadow visible or invisible with the Eye Icon on the left

# Depth of Field: Tilt Shift

1. Double Click on the Action File (.atn) to install
  2. Press Play and adjust position and blur amount
- Note: The PS Action duplicates the file and flattens all layers to prevent deleting/overwriting the PSD File.*
